Upcoming Events

[Renal Health Among Chinese-Americans – A Service Project](#) – 11/23

Led by: Albert Sean Chiou and Jessie Tao, Harvard Medical School students, and their mentor, Li-Li Hsiao, MD, PhD, Instructor, Renal Division, Brigham and Women's Hospital and Director of the BWH Asian Renal Clinic. All are welcome to this Clinical Discussion Session Series for Fellows. Please register: [Children's Hospital Office of Fellowship Training](#)

[Applying for an NIH Career Development Award](#) - 11/30

A workshop for Clinical Investigators applying for an NIH K08 or K23 Mentored Clinical Scientist/Investigator Career Development Award. [Please register.](#)

[Professional Renewal in the Practice of Medicine](#) - 12/18

For physicians and scientists, Dr. Charles Hatem will address the pressures inherent in our professional life, propose approaches to foster well being, recognize the need for self renewal to be more satisfied and balanced in our work and reaffirm the value of our work. Dr. Hatem is the Harold Amos Professor of Medicine, and Director of the Academy Center for Teaching and Learning at HMS. [Please register.](#) Contact: BWHCFDD@partners.org

Announcements

[The Partners International Office \(PIO\) Wants Your Ideas!](#)

The Partners International Office (PIO) is developing visa workshops/presentations and wants your input! The PIO is also adding information and content to their website and welcomes your suggestions. Please visit the [PIO website](#) and see the quick links in the upper right corner of the page to submit your ideas.

[Training Course in fMRI](#) - application deadline 1/15/10

The University of Michigan is offering a "Training Course in fMRI" on August 9-20, 2010. The course is targeted to graduate students, postdocs, or faculty with interests in neuroscience or biomedical engineering who want to learn about fMRI. For those students outside the University of Michigan, funding is available for their travel costs, including airfare, lodging, and meals. There is an application process and 25 students will be selected to be supported for attendance at the course.

[Harvard Stem Cell Institute NIH Training Grant's Call for Postdoc Applications](#)

– deadline 2/1/10

The Harvard Stem Cell Institute (HSCI) is now accepting applications for three (3) post-doctoral fellows to be funded by the HSCI's NIH Training Grant. Trainees will work in the lab of a specific PI, their primary mentor, and have a team of additional mentors to guide and inform their work. Students may choose a PI from the list of HSCI Principal Faculty. Other mentors will be assigned by the Training Grant Committee. Candidates must hold a permanent visa or possess U.S. citizenship. Contact: [Kate Chen](#), HSCI Associate Director of Gifts & Grants.

Did You Know?

[HMS/HSDM Postdoc Association](#)

The "HMS PDA" is open to all postdocs working at HMS and Harvard Academic Health Centers, such as BWH. The HMS PDA has many exciting professional and social activities planned and invites you to participate. One of the HMS PDA's primary missions is to foster a sense of community amongst the diverse set of people who comprise the Harvard postdoc community. Check out the [HMS PDA website!](#)

If You Missed It...

[Children's & DFCI International Day, Culture Made Visible](#) - 11/19

[Educating the Next Generation of Clinical Investigators: What Can Harvard Catalyst Offer?](#) - 12/1
