***You won't believe what you'll gain when we help you lose***

## **A Message from our Staff**

Welcome to the New Patient Information Session for Brigham and Women's Center for Weight Management and Wellness (CWMW). Congratulations on taking this important step toward a healthier you! Obesity can impact so many facets of one's life – appearance, medical health, emotional health and well-being, interpersonal changes and challenges, stigma and bias to name a few. As we learn more about obesity (as a disorder or disease) we begin to understand that it goes well beyond diet and exercise. Obesity is a complex process that can be caused by many factors including genetics, medications, medical disease, emotional aspects, nutritional interests, and environmental concerns. You may have been led to believe otherwise, but **obesity is not your fault**. Weight loss surgery is the only proven long-term solution to obesity and its related health concerns. Choosing surgery is one of the most important decisions you can make for yourself. Weight loss surgery empowers you to regain control toward a healthier you.

Each one of our sites is accredited by the Metabolic and Bariatric Surgery Accreditation and Quality Improvement Program (MBSAQIP). This designation is awarded to recognize the safety and quality of bariatric surgery programs by the American College of Surgeons. Our dedicated team of nationally recognized experts (surgeons, physician assistants, psychologists, and dietitians) will support you at every step of the way. Our surgeons are active members of American Society of Metabolic and Bariatric Surgery, with many years of leadership and experience in treating obesity. You will be cared by experts in a safe environment. In addition, our program is designed to take care of you for the long-term, offering both pre- and post-operative counseling, support groups, educational forums, and online support.

You probably have several questions about the risks, benefits, and your journey to and after the surgery. The goal of today's session is to review the following:

- The qualifications for surgery
- The types of weight loss surgery procedures we provide
- The risks and benefits of weight loss surgery
- Insurance coverage
- Appointments overview
- What your post-operative care will include
- How to have long-term success with weight loss surgery

Thank you for attending our information session. We look forward to answering any questions and welcome you to our program.

Sincerely,

The Team of CWMW

### Voice of a CWMW Patient

"I chose surgery because the medical issues related to being overweight for years were getting worse. My diabetes was out of control, and even with medication my A1C was always over 10. Congestive heart failure and kidney disease continued to worsen. After suffering two strokes in 2013, I realized I was not going to get better unless I had the surgery to help with the weight loss. I had the laparoscopic sleeve procedure and lost nearly 100 lbs within the first year. I am no longer insulin dependent, and I take less medications to control some of the other health issues. Since the weight loss, I experience greater mobility, feel better about myself and enjoy some activities I have not in years. I cannot thank my bariatric surgery team enough for making this life changing experience as uncomplicated as possible".

With Sincere Appreciation,

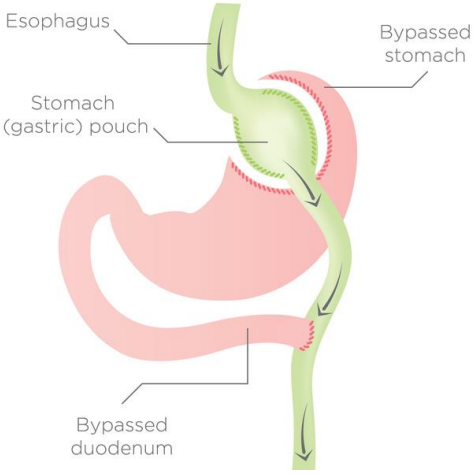

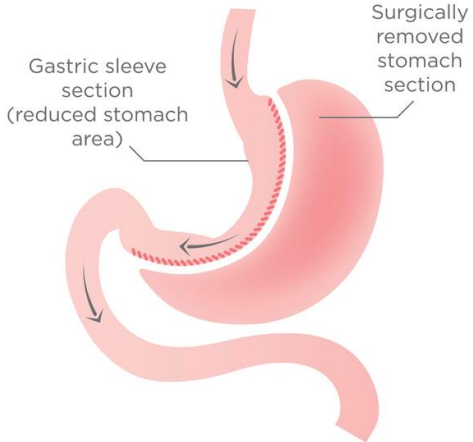

Michael, *CWMW Sleeve Patient*

**To qualify for weight loss surgery, you must have a BMI of:  
35 with weight-related health problems (type 2 diabetes, high blood pressure, sleep apnea)  
OR  
40 with or without weight-related health problems.**

## Commonly Offered Bariatric Surgeries

	<b>Gastric Bypass</b>	<b>Sleeve Gastrectomy</b>
<b>Technique</b>	Laparoscopic	Laparoscopic
<b>Length of Surgery</b>	2 hours	1-2 hours
<b>Time in Hospital</b>	1-2 days	1 day
<b>Return to Work</b>	1-2 weeks	1-2 weeks
<b>Weight Loss</b>	~30% total weight loss at 2 years	~25% total weight loss at 2 years
<b>Anatomy Changes</b>	 <p>The diagram illustrates the anatomical changes for Gastric Bypass. It shows the esophagus leading to a newly formed stomach (gastric) pouch. The original stomach is bypassed, and the duodenum is also bypassed, connecting directly to the small intestine. Labels include: Esophagus, Stomach (gastric) pouch, Bypassed stomach, and Bypassed duodenum.</p>	 <p>The diagram illustrates the anatomical changes for Sleeve Gastrectomy. It shows the stomach with a large portion removed, leaving a narrow, tube-like gastric sleeve section. Labels include: Gastric sleeve section (reduced stomach area) and Surgically removed stomach section.</p>

## What Are My Next Steps?

### **Step 1 – Insurance**

- ✓ Verify your insurance
  - Make sure to speak with benefits representative
  - Ask your insurance company if the gastric bypass or the sleeve gastrectomy are covered by using the CPT Code provided
  - Are Brigham and Women's Hospital and/or Brigham and Women's Faulkner Hospital and/or South Shore Hospital "Within Network"?
  - Does my plan require a "Center of Excellence" institution?
- ✓ Verify your employer's policy with your HR representative
  - Sometimes employers can customize the plan to include and exclude specific coverage, such as bariatric coverage
- ✓ Verify if there is a certain amount of required time you must document attempted weight loss
- ✓ Verify mental health benefits
- ✓ Complete or update patient registration - **866-489-4056**
- ✓ Obtain referral for surgeon visit (if needed)

CPT Codes:

Gastric Bypass (43644)

Sleeve Gastrectomy (43775)

### **Step 2 – Start the Pre-operative Process!**

- ✓ Contact our New Patient Coordinator (617-732-6960) to schedule your Core Appointments
  - Surgeon Consult
    - Labs
  - Group Nutrition Class
  - Behavioral Assessment
  - Nutrition New Patient Assessment
  - Nutrition Follow-up
  - Imaging
  - Surgeon Follow-up

## **Not sure about moving forward with surgery?**

**It's ok to meet with a surgeon before committing to the program! Schedule a surgeon consult only.**

The Center for Weight Management and Wellness offers non-surgical, medical and endoscopy treatment for weight management. Call 617-525-3597 to schedule these appointments.

## POWR Questions & Answers

### 1. What is POWR?

- POWR stands for **Pre-Operative Weight Reduction**. This virtual group covers topics to help patients get ready for surgery. It also meets insurance requirements for patients that need to participate in a mandated, medically supervised weight loss program prior to surgery. All are welcome to attend POWR!

### 2. What's the difference between POWR and a nutrition appointment?

- A nutrition appointment is an **individual visit** with a dietitian that meets our program's preoperative requirements. POWR is a virtual **group visit** with a dietitian covering nutrition education.

### 3. Do I need to make an appointment for POWR?

- Yes! POWR groups meet virtually on the 2<sup>nd</sup> and 4<sup>th</sup> Wednesday of each month at 1pm. You may attend on the day that works best for you.

### 4. How do I meet my insurance requirement?

- You **MUST** attend **at least 1** nutrition visit OR attend 1 POWR group **per month** for the amount of time required by your insurance (i.e. 3-6 consecutive months, depending on your insurance).

### 5. What happens if I miss a month?

- If you **miss** a month, you must **restart** the monthly insurance requirement. (See examples below)

#### Completed POWR Example

Nutrition Visit/ POWR	Month	Attended?
Nutrition Class	March ( <b>month 1</b> )	✓
Nutrition Assessment	April ( <b>month 2</b> )	✓
Nutrition Follow-up	May ( <b>month 3</b> )	✓
POWR	June ( <b>month 4</b> )	✓
POWR	July ( <b>month 5</b> )	✓
Nutrition Follow-up	August ( <b>month 6</b> )	✓
<b>Completion of 6 months</b>		

#### Incomplete POWR Example

Nutrition Visit/ POWR	Month	Attended?
Nutrition Class	March ( <b>month 1</b> )	✓
Nutrition Assessment	April ( <b>month 2</b> )	✓
POWR	May ( <b>month 3</b> )	✓
Nutrition follow up ( <b>Missed</b> )	June ( <b>month 4</b> )	<b>No</b>
POWR	July ( <b>month 1</b> )	<b>*Restart</b>

\*Please refer to #6

Please note that you **can** attend a POWR group **before** any of your scheduled visits

## Bariatric Patient Checklist

- Insurance Verification (page 6) \_\_\_\_\_
- Surgeon Consult \_\_\_\_\_
- Group Nutrition Class \_\_\_\_\_
- Nutrition Individual Assessment \_\_\_\_\_
- Nutrition Follow-Up (may need more than one) \_\_\_\_\_
- Behavioral Consult \_\_\_\_\_
- UGI (or other abdominal imaging) \_\_\_\_\_
- Blood Draw (ordered by surgeon at first consult) \_\_\_\_\_
- Letter of Medical Necessity from primary care provider \_\_\_\_\_
- Consultation from other providers as needed \_\_\_\_\_
- Nutrition Visits 3 or 6 months in a row (if required by insurance, see grid above) \_\_\_\_\_

Monthly Requirements	Insurance Providers
6 months	MassHealth, Anthem BCBS (any state), BCBS Rhode Island, Unicare/GIC, *United/United Choice Plus
3 months	BCBS Federal, Cigna, Aetna**, Medicare, *United/United Choice Plus
Not Required	BCBS MA, Harvard Pilgrim, Allways, Tufts
<b>Subject to individual policy</b>	All others (especially out-of-state policies)  *United is 3-6 months depending on individual plan **A minimum of 12 appointments with health professionals that discuss a nutrition and/or behavioral treatment plan that supports weight management

\_\_\_\_\_

## **Recommendation Letter Template for Primary Care Physician**

All insurance companies require a recommendation letter from your primary care physician (PCP). Please feel free to provide the following information to your PCP.

The letter must include the following sections:

1. Identifying Demographics
2. History of Morbid Obesity
  - a. Minimum should be 2 years, best to include 5 years
    - i. History of actual weights should be documented (ex. 11/15/2016 weight 345lbs)
3. Past Medical History
  - a. History of any co-morbid factors as a result of or related to morbid obesity
    - i. Diabetes Mellitus
    - ii. Hypertension
    - iii. Asthma
    - iv. Obstructive Sleep Apnea
4. Statement of Medical Clearance and Recommendation for Bariatric Surgery

This note must be sent to your surgeon's office in order to allow us to obtain authorization for surgical intervention from the insurance carrier. This letter can be faxed to 617-734-0336.

List of Bariatric Surgeons:

Scott A. Shikora, MD, Director (not accepting new patients)  
Neil Ghushe, MD  
Malcolm K. Robinson, MD  
Eric Sheu, MD  
David Spector, MD  
Ali Tavakkoli, MD  
Thomas Tsai, MD  
Ashley H. Vernon, MD

If you have any questions, please do not hesitate to contact us.

Sincerely,

**The Center for Weight Management and Wellness**
