

Appendix 1:

Olsen Growth Curves for Intrauterine Growth

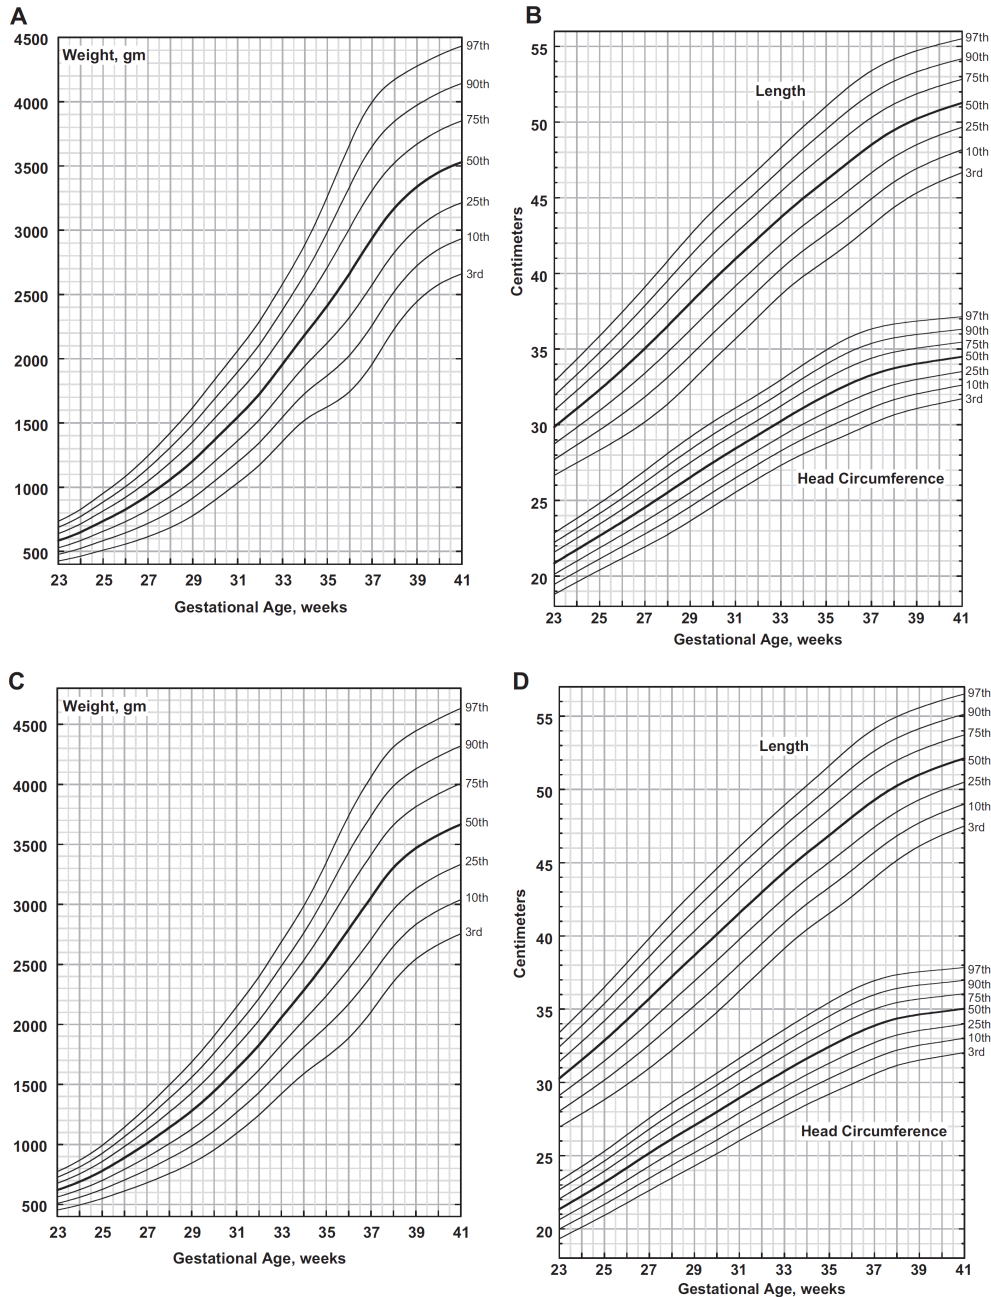

FIGURE 1
 New gender-specific intrauterine growth curves for girls' weight-for-age (A), girls' length- and HC-for-age (B), boys' weight-for-age (C), and boys' length- and HC-for-age (D). Of note, 3rd and 97th percentiles on all curves for 23 weeks should be interpreted cautiously given the small sample size; for boys' HC curve at 24 weeks, all percentiles should be interpreted cautiously because the distribution of data is skewed left. Adapted from Groveman.²⁰
