

Research Association of Orders

When placing orders for an Inpatient or “HOV” (Hospital Outpatient Visit) remember to “Research Associate” in Epic. This identifies the order as research and also drives charges to the Research Billing Review report to prevent charges from going to the patient.

It is located under the “Options” button in upper right hand corner of the ordering screen.

When placing orders for an Ambulatory or Outpatient clinic visit, the Research Association button displays at the bottom of the ordering screen. Note the beaker icon indicating the “linked” order.
