Application deadline:
April 1, 2015
*for fellowship positions
to begin July 1, 2015*

University of Wisconsin Surgical Oncology Research Training Program

The University of Wisconsin Surgical Oncology Research Training Program is designed to:

- Provide training in the conduct of basic, translational, health services, and clinical surgical oncology hypothesis-based research
- Provide experience in the design, organization, conduct, analyses, and publication of interdisciplinary research
- Develop leaders in academic surgical oncology research

Post-doctoral fellows accepted into the Surgical Oncology Research Training Program engage in a mentored research experience which is complemented by a curriculum in clinical trials, research design, ethics and data analysis. The training program fosters the development of knowledge, competence, skills, professional attitudes, and experience required for successful academic careers in laboratory, translational, clinical or outcomes surgical oncology research.

Trainees will obtain a knowledge base in six core competency domains:

- Biostatistics and study design
- Ethics
- Leadership and management
- Presentation and teaching
- Scientific writing and verbal communication
- Basic, translational, health services, and clinical oncology research

Applicants must have completed at least two years of general surgery residency and must be U.S. citizens or non-citizen nationals, or permanent residents of the U.S.

Individuals from underrepresented racial and ethnic backgrounds are encouraged to apply.
